### **DETAILED ACTION**

#### Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 33-35, drawn to an apparatus for the creation of electronic data software for yielding information for indication of antimicrobial synergism, classified in class 703, subclass 12.
- II. Claims 36 and 37, drawn to a process for formulating an antimicrobial synergistic composition through inputting data into computer memory and calculating the degree of synergism, classified in class 703, subclass 12.
- III. Claims 38 and 39, drawn to a process for eliminating *Eschericia coli*, *Enterococcus hirae*, *Pseudomonas aeruginosa*, *Staphylococcus aureus* or *Saccharomyces cerevisae* from the scalp epidermis or scalp hair comprising administering indole, 4-terpinenol and salicylaldehyde, classified in class 514, subclasses 415, 699, 729 and 731.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the invention of Group I is directed to an apparatus for the creation of electronic data software; the invention of Group II is directed to a process for formulating an antimicrobial synergistic composition; and the invention of Group III is directed to a

Art Unit: 1616

process for eliminating a microorganism by applying indole, 4-terpinenol and salicylaldehyde to the scalp. Each of the three inventions have different designs, modes of operation and effects.

2. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

### Telephonic Inquiry

A telephone call was made to Arthur Liberman, Esq. on 19 March 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of

Art Unit: 1616

record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nathan W. Schlientz whose telephone number is 571-272-9924. The examiner can normally be reached on 8:30 AM to 5:00 PM, Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
